CLAIMS

1   1.   A method of controlling at least one production device for producing a
2   television show, comprising the steps of:
3   establishing a plurality of states of the at least one production device, each state
4   corresponding to at least one operation executable by the device;
5   storing the states of the at least one production device as corresponding memory
6   objects which upon execution cause the one production device to execute the at least one
7   operation, which results in generation of a scene
8   responsive to selection of each memory object; actuating at least one actuator to
9   control an operation of the at least one production device in accordance with the at least one
10   operation associated with that state memory object.

1   2.   Apparatus for controlling at least one production device for producing a
2   television show, comprising the steps of:
3   means for establishing a plurality of states of the at least one production device, each
4   state corresponding to at least one operation executable by the device;
5   means for storing the states of the at least one production device as corresponding
6   memory objects which upon execution cause the one production device to execute the at least
7   one operation, which results in generation of a scene
8   means responsive to selection of each memory object, actuating at least one actuator to
9   control an operation of the at least one production device in accordance with the at least one
10   operation associated with that state memory object.
